Rabbit Data Collection

	Field	Field Options	Field Description
Administration	Location/ GPS points		Number of a GPS point/waypoint collected or the eastings and northings. This is a temporary field prior to the information being converted into a MapInfo table.
	Date		Date record taken and works start.
	Name		Name of people/person mapping and/or doing the works (including operator and supervisor). Initials are okay, as long as it is possible to identify the people present.
	Organisation		Name of the organisation collecting the data and/or doing the works.
Rabbit Information	Rabbit Activity	Absent	An assessment of the level of rabbit activity/abundance.
		Low	
		Medium	
		High	
	Warren Harbour ID		Description or identification (tag number) for a warren or harbour.
	Number of entrances		Number of entrances to a warren.
	Warren activity	Inactive	An assessment of the activity of a warren.
		Active	
	Comments		Details of the location, harbour available, signs of rabbit presence, source of the rabbits, suggested control, issues or risks.
Control Works	Control method		Control method used (e.g. netting, baiting, ferreting, fumigation, shooting)
	Chemicals used		Pesticides/chemicals used and rate (rate per 10L/total Volume) (if applicable).
	Rabbits killed		Number of rabbits killed.
	Hours taken		An optional field to record the time taken to do the control work. May be useful when invoicing.
	Invoice number		Your invoice number for the works.
	Works IDs		Unique ID that links to the corresponding goal/s and action/s in the Works Plan.
